what is the price of RS-X5 Puzzle?

@sn-development

The screenshot shows the Google AI for Developers website. The top navigation bar includes links for Models, Solutions, and Code assistance. A sidebar on the left lists various AI models and tools: Gemini, LangChain, FastAPI, Pinecone, AI Agents, API keys, Get started, Database, Assistant, Inference, API keys, Manage, ER USAGE, RUs, Storage, and The FastAPI. The main content area displays information about the Gemini model, including its introduction, overview, quickstart, tutorials, API keys, libraries, how-to guides, conceptual resources, ecosystem, and developer documentation. It also shows usage statistics like 7.9K / 2M RUs and 42 / 1M Storage.
